Protecting Indiana's Water Supply Video Available Online and on DVD

Water is the basis and essence of all life. And yet, its value is often overlooked or taken for granted. We turn on the faucet or do laundry or flush the commode almost automatically, with little appreciation for this important and necessary resource flowing through the pipes. We simply expect it to be there when we need it." And yet, for many communities, small-towns, and residents all over Indiana, that supply of clean water is being threatened. Failing septic systems and aging, deteriorating infrastructure (both wastewater and drinking water) are compromising our continued connection to dependable supplies of what all living things need most: safe, clean water.

A new video titled "Drop by Drop: Protecting Indiana's Water Supply" was recently developed and is now available from Indiana's WFYI Channel 20 Public Television station for interested

individuals and groups to purchase for \$20.00 each plus shipping & handling. More details and selected clips from the video are also available on the WFYI website at:

www.wfyi.org/DropByDrop.asp. You can learn more about ordering the DVD from WFYI by going to their product catalog on the web at: www.wfyi.org/store/default.asp. The video was originally aired on the PBS station on July 22, 2010.

The "Drop by Drop" DVD examines the fact that there is no new water on planet earth. Instead, the water we have is perpetually recycled. Therefore, how we treat our water today has a direct effect not only on ourselves, but also on the health and wellbeing of our fellow Hoosiers for generations to come. In "Drop by Drop: Protecting Indiana's Water Supply", the mysteries of where our water comes from and where it goes once it disappears down the drain are unlocked. Viewers will witness real-life stories of the challenges people face - and overcome - in their efforts to bring clean water to their communities. Support for this special water program video was provided by the Indiana Regional Sewer Districts Association and by the Alliance of Indiana Rural Water. If you would like to learn more about these groups their respective web sites are:
